Resources

Types

Users may contribute many types or categories of resources. All HUBs come with a default set of types. They are:

- Animations
- Courses
- Downloads
- Learning Modules
- Notes
- Online Presentations
- Publications
- Series
- · Teaching Materials
- Tools
- Workshops

Some types can be contributed by any user via the front-end "contribute― component. Some types, such as Learning Modules or Series cannot presently be contributed via the front-end due to their complex nature (more on this below).

Creating New Types

The default list of types may not completely suit your needs and you may wish to add your own, new types. This can be done from the administrative back-end of the site by following these steps:

- 1. Login to the administrative back-end.
- 2. Once logged in, find "Components― in the main menu bar located toward the top of the page. You should be presented with a drop-down menu containing a list of all the installed components on your HUB.
- 3. Select "Resources― from the list.

RESOURCES

Fill in the title field (what you want this type to be called) and select "Main Type― from the category list. You may then optionally fill in a description (longer explanation) of this type.

Decide if this resource type can be contributed from the front-end "contribute― component by checking/unchecking the "contributable― checkbox. Due to the complex structure of some resources, the front-end "contribute― component cannot handle the creation of some resource types. This checkbox ensures what such a resource type does not accidently show up as a type the user can self contribute.

Next, you may decide what custom fields you wish to have filled in by the user for that resource type. Options are single-line text boxes or multi-line text areas. A field may be required or not. If no custom fields are added, the resource type will appear with a default set of fields: Bio, Credits, Citations, Sponsored By, References, Publications (all multi-lined textareas)

RESOURCES

Click "Save― (icon looks like a floppy disk) in the toolbar on the top right of the page.
New resource types should now be available as a resource option and changes to types should take affect immediately.
