

# ssh and sftp

## Install

These packages aren't working properly. Please don't install until this message is removed. If you have installed them already please purge them using the "purge" option instead of "install"

```
# apt-get install hubzero-ssh
# apt-get install hubzero-sftp
```

## Configure

These modules aren't working properly. Please don't install until this message is removed. If you have configured them already please disable them using the "--disable" option instead of "--enable"

Support for basic ssh/sftp configuration was added with hubzero-cms\_20130131.1

```
# hzcms configure ssh --enable
# hzcms configure sftp --enable
```
