What are Wiki Pages?

Wiki Pages are meant to be user-created community editable pages covering a specific topic or topics. Wiki pages allow users to share their knowledge of a subject and related areas in a simplified mark-up with a complete history of page changes.

If you know the URL of your wiki page (which, by default, is the title you have set for your page, only with no spaces), you can get to it by typing it on the address bar in this format: https://yourhub.org/wiki/NAME_OF_YOUR_PAGE. Making a List of Available Wiki Pages

When a new wiki page is created, there is really no way to access the newly created wiki unless you know the URL of it (see Creating a Wiki Page tutorial to figure out the URL of your wiki page). *A wiki macro (or custom function to insert dynamic content in a page) can be added to a page to display a list of existing wiki pages within a given wiki.*

To add a wiki macro that generates a list of all wiki pages:

1. Go to the Edit section of the wiki page you would like to edit.
2. Type in **[[TitleIndex]]** where you want the list to appear

3. Click **Submit**.

You will then see a bulleted list of all available pages where you added the macro.
