

### Example Files

#### Small Files

Files less than 100MB, can be placed in the 'data' or 'examples' directory within the tool repository.

#### Large Files

Files greater than 100MB, should be placed in the appropriate /data directory outside of the tool repository. This path can be accessed directly. In typical situations /data is organized by tool and/or group. Either of these locations is suitable for maintaining large static datasets.

**Note:** this is by special request only, please contact your HUB administrator.
