

Customization

Customizing a Group's Look

1. On your main group, click on **Group Manager** and click on **Edit Group Settings**
2. Use the box on the right side of the page to upload a photo. Choose that photo from the drop-down box in the **Group Logo** section
3. Specify access to individual tabs within the group in the **Group Access** section by selecting the desired option to the right of item in the list
4. Click **Save Group** to save your changes
5. To customize all the group pages at once, click on **Manage Group Pages** in the **Group Custom Content** section. This will take you different interface away from the group customization area, please save all other changes before making this customization

Customizing a Group's Calendar

Users can subscribe to a group calendar two separate ways:

1. [Download](#): They can download a group calendar of events and import that into their calendar off the HUB.
2. [Subscribe](#): They use a calendar application such as iCal or Outlook to subscribe to the group calendar.

Downloading the Group Calendar

To download a group calendar, navigate to a group's calendar tab. If you scroll down, under the calendar of events you should see a box titled "Subscribe", which looks like the image below

Here you can pick which of the group calendar's you want to download. After you have made your choices simply click the *[Download](#)* button. A iCalendar file (.ics) will be downloaded by your browser, which you can then import into any calendar application with iCalendar support.

[Here is a list of applications with support for iCalendar files \(.ics\) ?](#)

Subscribing to the Group Calendar

Subscribing to a group calendar has 1 major benefit over downloading a group calendar; changes made to the group events on the HUB are reflected in the subscribers calendar.

To subscribe to group calendar follow the same steps described above to download a calendar but instead click the [Subscribe](#) button. This will open the default calendar application on your calendar with a dialog box asking if you would like to subscribe to this calendar. If the groups calendar access setting is restricted to Registered HUB Users or Group Members, you will also be prompted for you HUB login and password.

Subscription FAQs

- [Can I subscribe with Google Calendar?](#)

1. Can I subscribe with Google Calendar?

Currently Google Calendar doesn't support private or authenticated calendar subscriptions, which is good for the security of your data, but bad if you like having all you calendars in one place. Only if a group's calendar access setting is set to [Any HUB Visitor](#) will users be able to subscribe with their Google Calendar. This setting can be changed at anytime by any group manager, in the group customize interface.

An alternative for Google Calendar users is that they download and import a group calendar following the steps described above.

Customizing Group Pages

Managing Group Pages:

1. Log in to the frontend of the Hub and access a Group that allows users access to managing pages in the Group
2. Hover over the down-arrow, next to the **Group Manager** button

9. Underneath the Settings, select a category from the Category drop-down, and the settings you want for Comments from the drop down
10. Click Save Page to save the new page and the newly added content

Embedding PHP or Javascript Code in a Group Page (advanced feature):

It is possible to insert PHP or Javascript Code into a Group page to allow more flexibility when constructing a page. This is a feature meant for developers to provide advanced capabilities the page. Due to security considerations, a page approver must be assigned on the administrator Group interface under "Options". This is a textbox that is expecting a comma separated list of usernames who will be messaged when a page containing PHP or Javascript code is submitted. Until the page is approved, the previous version will be displayed or a message indicating the page needs to be approved, if there exists no previous version.

Group Forum: Digest Emails

Group members have the ability to receive emails from the group forum. The group member can be emailed every time another member creates a new post in a forum. Each group member can manage their own settings so they receive new posts in the group.

1. Navigate to the main Group page then click on the **Forum** tab
2. Inside of the Group Forum, locate *Email Settings* and click on **Change your settings**
3. In the pop-up determine the preferred email setting by clicking the check box next to *Email me about new posts in this group*
4. Then, select the radio button next to the preferred emailing time frame of receiving group forum emails **Individually as new posts are made** or **As part of a (Daily, Weekly, Monthly) digest email**
5. Click **Save** to save the email setting changes
