

PHP

Configure PHP

Edit `/etc/php5/apache2/php.ini` and set the `display_errors` parameter to 'Off' and `log_errors` to "On".

```
display_errors = Off  
log_errors = On
```

then restart apache to enable everything.

```
# /etc/init.d/apache2 restart
```

Test

```
# echo "<?php phpinfo();?>" > /var/www/index.php
```

Go to `/index.php` on your site and you should see a php status page.

Delete the test page when you are done.

```
# rm /var/www/index.php
```
