

Tools

Changing the Developer URL

When accessing a tool's development page, there is a link available under the "What's next?" section on the right-hand side of the page (see the sample image below). This link should direct the user to the yourhub.org/tools page corresponding to that particular hub. But if that is not the case, the link can be changed quickly from the backend administrator interface; simply follow the instructions below.

Contribtool: Status for testool - Registered All Tools [New Tool](#)

STATUS: **Registered** [Created](#) [Uploaded](#) [Installed](#) [Approved](#) [Published](#)

This tool is one of 1 tools under development on myhub.

Tool Information edit

Version	This version 1.0 (under development)
At a glance	This is a test tool
Description	Preview Edit this page
VNC geometry	780x600
Tool execution	open to public
Source code	open source
Project area	open to public
Development team	

What's next?

Our team will create a project area for you in **MyHubForge**, and then give you instructions about how to upload your source code. It's been 21 minutes since your request. You should normally receive response within 24 hours

Remaining steps before we can publish your tool:

- Register your tool on the myhub
- Upload your source code into your project area on MyHubForge
- Make the page that describes your tool. [Create this page...](#)
- Test and approve your tool
- Publish your tool so that others can see it on the MyHUB

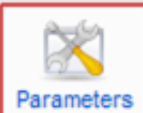

Confused about the tool contribution process? [View resources explaining contribution steps.](#)

Begin by...

1. Logging into the *Joomla!* administrative interface corresponding to your site
2. Then, navigate to "Components -> Contribtool" from the main menu bar on the top of the screen
3. Next, select parameters from the top-right corner of the page
