

Modules

Overview

Most modules will have a set of parameters that can be configured. These parameters can determine what functionality is presented to the user, be a default set of user options, or settings needed for the module to function properly (setting the URL to a feed for a feed reader module, for instance). Accessing and adjusting these parameters is quick and easy.

Note: Not all modules will have configurable parameters. For those that do, the configurations apply **only** to that module instance. You may have multiple instances of a module with different parameter configurations.

1. First login to the administrative back-end.
2. Once logged in, go to the "Module Manager." The Module Manager can be found by selecting "Extensions" > "Module Manager" from the drop-down menu on the back-end of your HUB installation.

3. Choose the module you wish to configure from the available list.

MODULES

The screenshot shows the Joomla! Module Manager interface. At the top, there is a navigation bar with tabs for Site, Users, Menus, Content, Components, Extensions, and Help, along with a Log out button. Below the navigation bar, the Module Manager title is displayed with a grid icon. To the right of the title are icons for Enable, Disable, Copy, Delete, Edit, New, and Help. The main content area shows the site name "Administrator" and a filter section with "Go" and "Reset" buttons. Below the filter is a table of installed modules.

#	<input type="checkbox"/>	Module Name	Enabled	Order	<input type="checkbox"/>	Access Level	Position	Pages	Type	ID
1	<input type="checkbox"/>	My Submissions	✓	7		Public		None	mod_mysubmissions	41
2	<input type="checkbox"/>	Breadcrumbs	✓	1		Public	breadcrumbs	All	mod_breadcrumbs	73
3	<input type="checkbox"/>	Events Calendar	✓	0		Public	eventsLeft	Varies	mod_events_cal	39
4	<input type="checkbox"/>	Latest Events	✓	0		Public	eventsRight	Varies	mod_events_latest	38
5	<input type="checkbox"/>	Featured Resource	✓	0		Public	featureLeft	Varies	mod_featuredresource	74
6	<input type="checkbox"/>	Community Poll	✓	n		Public	featureMiddle	Varies	mod_xpoll	33

4. Once the page has loaded, find the “Parameters” grouping, found on the right-hand portion of the screen.

The screenshot shows the Joomla! Module Parameters configuration page for the 'Main Menu' module. The page is divided into two main sections: 'DETAILS' on the left and 'PARAMETERS' on the right. The 'PARAMETERS' section is highlighted with a red border. The 'DETAILS' section includes fields for Module Type (mod_mainmenu), Title (Main Menu), Show Title (radio buttons for No and Yes), Enabled (radio buttons for No and Yes), Position (user3), Order (0: Main Menu), Access Level (Public, Registered, Special), ID (1), and Description (Displays a Menu). The 'PARAMETERS' section includes a dropdown for Module Parameters, Menu Name (mainmenu), Menu Style (List), Start Level (0), End Level (0), Always show sub-menu Items (radio buttons for No and Yes), and Target Position. At the bottom of the 'PARAMETERS' section, there is a link for 'Advanced Parameters'.

5. Adjust the available parameters as needed and then click "Save" (the icon that looks like a star) in the upper right portion of the page. Changes take affect immediately.
