Publications

Component Configuration

Publications component configuration controls the display of publications pages, as well as the publication submission flow. To edit settings, go to **/administrator ? Components ? Publications ? Options**. Your options are explained below.

- **Component ON/OFF** Enable/disable Publications on your hub. When turned off, /publications will redirect to /resources.
- **Auto-approve** Automatically approve new submissions.
- **Auto-approved Users** A comma-separated list of login names of users whose publication submissions get auto-approved.
- **Email authors** Email contributors when administrator make changes to status of a publication.
- **Default category** Optionally set the browsing category of newly created publications to the specified value if exists. Default: *dataset*
- **Default picture** Default placeholder thumbnail image for all publications. Default: */components/com_publications/assets/img/resource_thumb.gif*
- **Default tool picture** Default placeholder thumbnail image for tool publications. Default: */components/com_publications/assets/img/tool_thumb.gif*
- **Default video file thumbnail** Default placeholder thumbnail image for video-type files in publication gallery. Default: */components/com_publications/assets/img/video_thumb.gif*
- **Default image file thumbnail** Default placeholder thumbnail image for image-type files in publication gallery. */components/com_publications/assets/img/gallery_thumb.gif*
- **Publication file path** Master path for storing published data. Default: */site/publications*

Digital Object Identifiers.

All required fields must be filled for the DOI service to work. If Service or Shoulder are left blank, publications will be released without a DOI. If other required fields are left blank, there will be a failed attempt to create a DOI resulting in error for end-user.

- **About DOI link** A link to an explanation of what Digital Object Identifiers (DOI) are. [optional]
- **DOI shoulder** Shoulder for issuing DOIs (what goes after doi:) [required]
- **DOI handle prefix** Prefix for DOI handles if required.
- **DOI service** DOI service URL [required]
- **DOI Service User/Password** DOI Service User/Password [required]
- **DOI XML Schema** URL of XML validation schema [required]
- **DOI publisher** Publisher name (may use full Hub name) for DOI service. Defaults to Hub name.
- **DOI resolve url** URL for resolving DOIs. Default: *http://dx.doi.org/*
- **DOI verify url** URL for verifying DOIs

- **Supported Tag** A tag to indicate organization-supported publications.
- **Supported Link** A link to describe organization-supported publications.

Show/hide publication information

Next series of parameters lets you show/hide the following data/sections on the publications page and/or during draft editing:

- **Contributors**
- **Ranking**
- **Rating**
- **Date**
- **Citations**
- **Tags**
- **Metadata**
- **Release Notes**
- **Access**
- **License**
- **Gallery**
- **Audience**

- **Suggest license** Allow users to suggest licenses. License suggestions get sent to administrators via support tickets. Administrator can then add a requested license via Publications back-end interface.
- **URL to Terms of Deposit** URL to a page with information on Terms of Deposit. This field is required. No value results in an invalid link at pre-publication review screen.
