

Editing Wiki Pages

Editing Content on Wiki Pages

To edit wiki content:

1. Open the wiki page you would like to edit.
2. Go to the Edit section of the wiki page.
3. Edit the page.
4. When you're done with all your changes, scroll down the bottom of the page and click **Preview** if you'd like to see how your page looks like before submitting it. Click **Submit** when ready.

The wiki page is now updated.

Uploading an Image or File to Wiki Pages

In order to embed an image or file on the wiki page, you must first upload the image or file in the wiki.

To upload an image or file:

1. Go to the Edit section of the wiki page you would like to edit.

EDITING WIKI PAGES

2. To the right of the page, you will see a box for uploading a file. Click on the **Browse** button.

The screenshot displays a wiki page editor for a group named "Test Group". At the top, there is a navigation bar with links for Home, My HUB, Resources, Members, Events, Topics, About, Support, and Help! Below this is a breadcrumb trail: "You are here: Groups > Test Group > Wiki > Main Page > Edit". The main content area is titled "Main Page" and includes tabs for Overview, Members, Wiki, Resources, and Discussion. On the right side of the main content area, there are links for "Delete page" and "New page". Below the main content area, there is a sub-section for "Article" with links for "Edit", "Comments", and "History". The main editing area has a "Title" field containing "Main Page" and a "Page text" field with a "REQUIRED" label. The page text contains the text "Welcome to this group's wiki page!". To the right of the editing area, there is a sidebar with instructions on how to change the page name and how to include an image using a macro. Below the sidebar, there is a file upload section with a "No Files Found" message and a "Browse..." button circled in red. There is also an "Upload" button below the "Browse..." button.

3. Locate the image or file you would like to upload and click **Open**.

EDITING WIKI PAGES

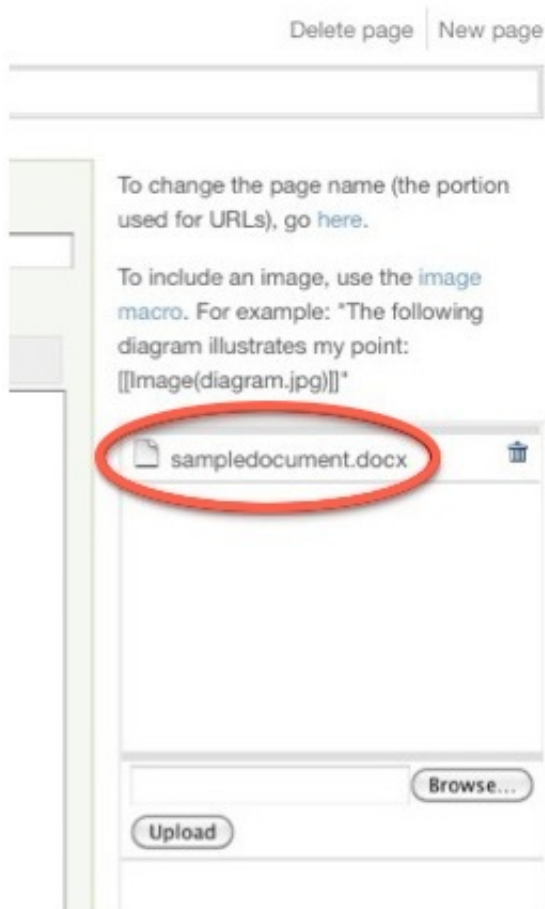

4. Click **Upload**.

EDITING WIKI PAGES

Your file is now uploaded in the wiki and you can now embed it in the wiki's Page text box so others can view or download it.

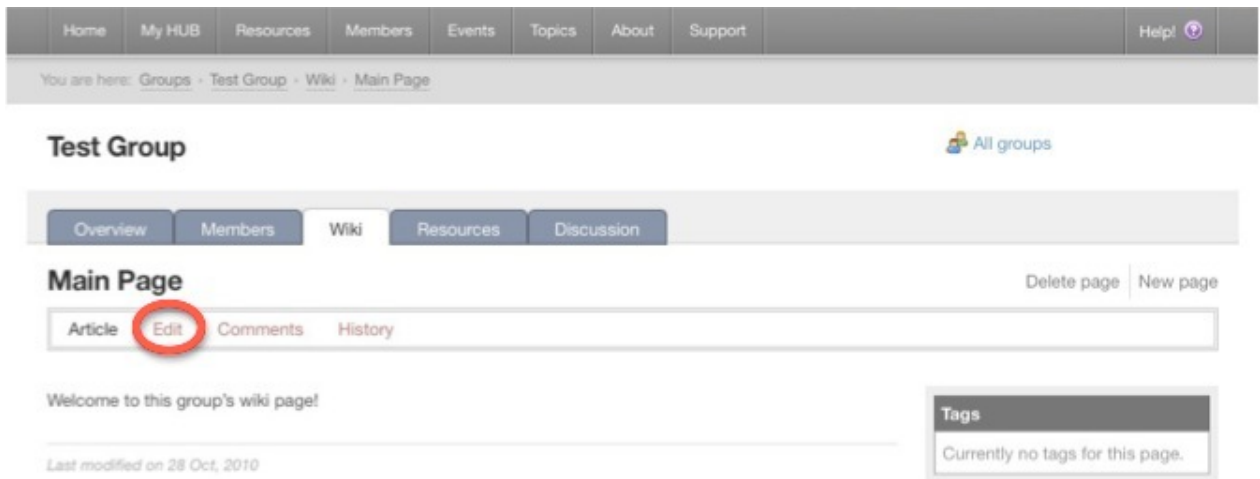

Embedding an Image or File on Wiki Pages

Note: In order to embed an image or file on the wiki page, you must first upload the image or file.

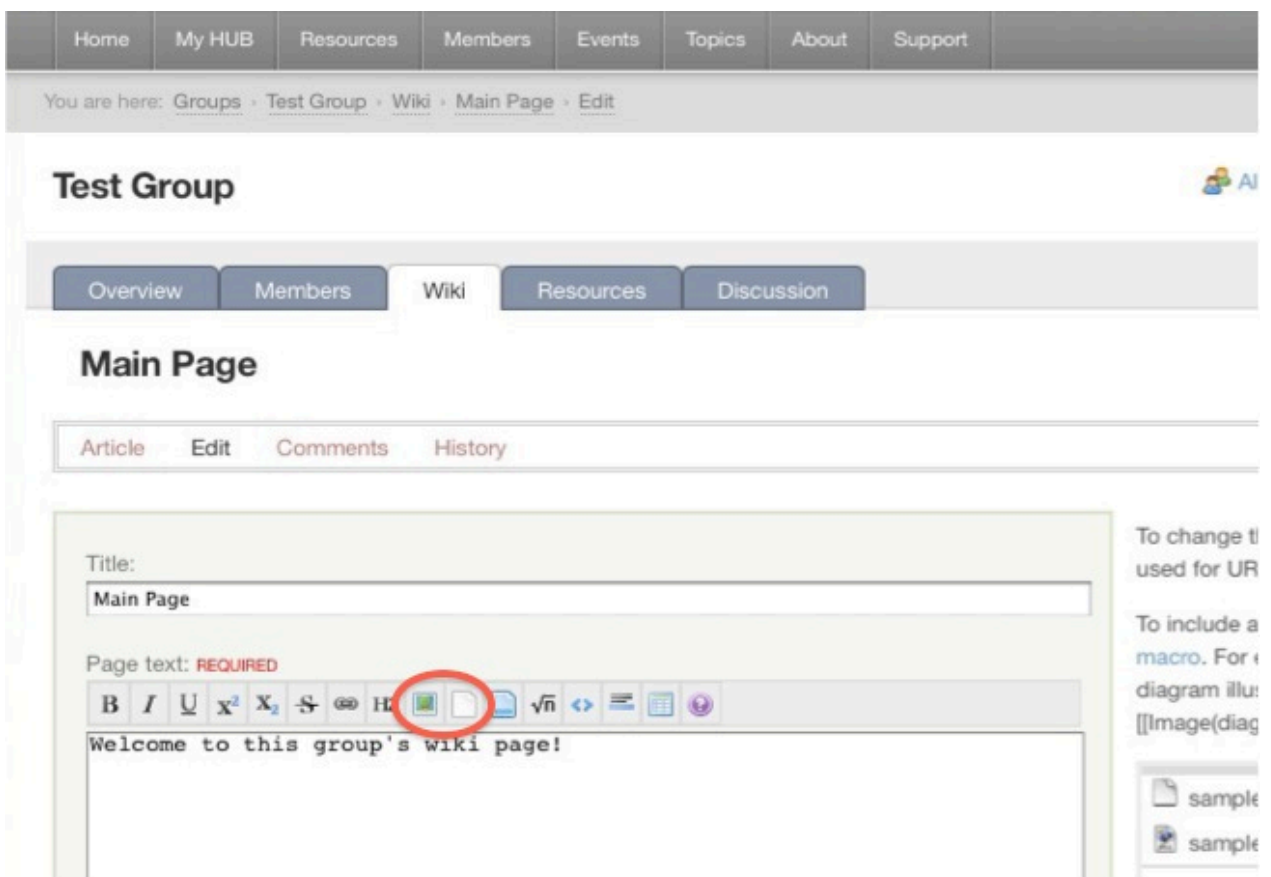

To embed an uploaded image/file:

1. Go to the Edit section of the wiki page you would like to edit.

EDITING WIKI PAGES

2. On the Page text box, place your cursor where you want the image or file to be. If you are uploading an image, click the **Embedded Image** button on the toolbar. If you are uploading a file, click on the **Embedded File** button.

3. Replace the highlighted text with the full name of the uploaded item you want to embed.

For image:

EDITING WIKI PAGES

The item you chose to embed will now appear in the area where you placed it on the wiki. If you embedded a file, it will show up as a link that users can download.

Making a List of Available Wiki Pages

When a new wiki page is created, there is really no way to access the newly created wiki unless you know the URL of it (see [Creating a Wiki Page tutorial](#) to figure out the URL of your wiki page). A *wiki macro (or custom function to insert dynamic content in a page)* can be added to a page to display a list of existing wiki pages within a given wiki.

To add a wiki macro that generates a list of all wiki pages:

1. Go to the Edit section of the wiki page you would like to edit.
2. Type in **[[TitleIndex]]** where you want the list to appear

3. Click **Submit**.

You will then see a bulleted list of all available pages where you added the macro.
