Projects

Enabling Plug-in to Projects

1. Login to the backend of the Hub and click on the "Extensions" tab.
2. Click on the "Plug-in Manager" under the "Extensions" tab.
3. Search "Projects- Databases" in the search field to locate the Data Store plug-in.
4. After locating the correct plug-in, check the box beside the "Plug-in Name".
5. Click the "Enabled" button to allow the plug-in to be used on the frontend of the Hub.

Restricting Plug-in to Specific Projects

1. Login to the backend of the Hub and click on the "Extensions" tab.
2. Click on the "Plug-in Manager" under the "Extensions" tab.
3. Search "Projects- Databases" in the search field to locate the Data Store plug-in.
4. After locating the correct plug-in, click on the title of the plug-in under the "Plug-in Name" column.
5. Inside the plug-in details, type in the names of the Projects in the "Restricted to projects" field.
6. Save the changes by click the "Save & Close" button.
