Projects

Enabling Plug-in to Projects

1. Login to the backend of the Hub and click on the **Extensions** tab.
2. Click on the **Plug-in Manager** under the **Extensions** tab.
3. Search **Projects- Databases** in the search field to locate the Data Store plug-in.
4. After locating the correct plug-in, check the box beside the **Plug-in Name**.
5. Click the **Enabled** button to allow the plug-in to be used on the frontend of the Hub.

Restricting Plug-in to Specific Projects

1. Login to the backend of the Hub and click on the **Extensions** tab.
2. Click on the **Plug-in Manager** under the **Extensions** tab.
3. Search **Projects- Databases** in the search field to locate the Data Store plug-in.
4. After locating the correct plug-in, click on the title of the plug-in under the **Plug-in Name** column.
5. Inside the plug-in details, type in the names of the Projects in the **Restricted to projects** field.
6. Save the changes by click the **Save & Close** button.
