

# CMS

## Install

You may install the latest version of the CMS (2.0.0)

```
# apt-get install -y hubzero-cms-2.0.0
```

or install the previous version of the CMS (1.3.1)

```
# apt-get install -y hubzero-cms-1.3.1
```

## Configure

```
# hzcms install example
```

It is necessary to immediately run the updater to apply fixes that have not been incorporated into the initial installation.

```
# hzcms update
```

```
# a2dissite default default-ssl  
# a2ensite example example-ssl  
# /etc/init.d/apache2 restart
```

### Test

The default installation of the CMS uses a self signed SSL certificate. Some browsers will not accept this certificate and not allow access to the site.

<https://support.mozilla.org/en-US/questions/1012036>

You will need to install a proper SSL certificate.
