Publications

Component Configuration

Publications component configuration controls the display of publications pages, as well as the publication submission flow. To edit settings, go to **/administrator? Components? Publications? Options.** Your options are explained below.

- Component ON/OFF Enable/disable Publications on your hub. When turned off, /publications will redirect to /resources.
- Auto-approve Automatically approve new submissions.
- Auto-approved Users A comma-separated list of login names of users whose publication submissions get auto-approved.
- Email authors Email contributors when administrator make changes to status of a publication.
- Default category Optionally set the browsing category of newly created publications to the specified value if exists. Default: dataset
- **Default picture** Default placeholder thumbnail image for all publications. Default: /components/com_publications/assets/img/resource_thumb.gif
- **Default tool picture** Default placeholder thumbnail image for tool publications. Default: /components/com_publications/assets/img/tool_thumb.gif
- **Default video file thumbnail** Default placeholder thumbnail image for video-type files in publication gallery. Default: /components/com_publications/assets/img/video_thumb.gif
- **Default image file thumbnail** Default placeholder thumbnail image for image-type files in publication gallery. /components/com_publications/assets/img/gallery_thumb.gif
- Publication file path Master path for storing published data. Default: /site/publications

Digital Object Identifiers.

All required fields must be filled for the DOI service to work. If Service or Shoulder are left blank, publications will be released without a DOI. If other required fields are left blank, there will be a failed attempt to create a DOI resulting in error for end-user.

- About DOI link A link to an explanation of what Digital Object Identifiers (DOI) are. [optional]
- DOI shoulder Shoulder for issuing DOIs (what goes after doi:) [required]
- DOI handle prefix Prefix for DOI handles if required.
- DOI service DOI service URL [required]
- DOI Service User/Password DOI Service User/Password [required]
- DOI XML Schema URL of XML validation schema [required]
- DOI publisher Publisher name (may use full Hub name) for DOI service. Defaults to Hub name.
- DOI resolve url URL for resolving DOIs. Default: http://dx.doi.org/
- DOI verify url URL for verifying DOIs

- Supported Tag A tag to indicate organization-supported publications.
- Supported Link A link to describe organization-supported publications.

Show/hide publication information

Next series of parameters lets you show/hide the following data/sections on the publications page and/or during draft editing:

- Contributors
- Ranking
- Rating
- Date
- Citations
- Tags
- Metadata
- Release Notes
- Access
- License
- Gallery
- Audience

- Suggest license Allow users to suggest licenses. License suggestions get sent to administrators via support tickets. Administrator can then add a requested license via Publications back-end interface.
- **URL to Terms of Deposit** URL to a page with information on Terms of Deposit. This field is required. No value results in an invalid link at pre-publication review screen.

Enabling LinkedIn Share Plugin

(Note: You have to be logged into your hub in order to complete the following tasks)

- 1. Click the "Components" tab and then select the "Publications" button located in the drop-down.
- 2. On the Publications page, select the "Plugins" tab.
- 3. Click the title of the "Publications -Share" plugin.
- 4. Under the "Basic Options" section, enable the LinkedIn icon share plugin by changing the radio button to "Yes".
- 5. Click the "Save & Close" button to save the changes and navigate back to the

Publications page.

Enabling Pinterest Share Plugin

(Note: You have to be logged into your hub in order to complete the following tasks)

- 1. Click the "Components" tab and then select the "Publications" button located in the drop-down.
- 2. On the Publications page, select the "Plugins" tab.
- 3. Click the title of the "Publications -Share" plugin.
- 4. Under the "Basic Options" section, enable the Pinterest icon share plugin by changing the radio button to "Yes".
- 5. Click the "Save & Close" button to save the changes and navigate back to the Publications page.
