

Collections

What are collections?

Collections are a quick and easy way to share, favorite, and organize information on a hub.

Note: You must be logged in on the hub in order to perform Collections functions other than looking through public collections.

Collection Tabs

Recent Posts: anything that a user follows such as a collection or another user is placed here. Whenever the collection or user posts a new post, the new post will appear on the feed. The feed is the first tab bar at the top the page.

Collections: where all of the collections that have been created by the user are stored. Here collections can be managed and created.

COLLECTIONS

Posts: where all the posts from every collection are stored. Here posts can be managed and created.

Followers: this tab displays all of the users on the Hub that are following your account.

Following: this tab displays all of the collections and users that are being followed by you. In the tab, links are provided back to each followed item by clicking on the blue title.

Posts vs. Collections

What is the difference between a post and a collection?

Post: A post is a singular piece of content that can be posted in a collection. A post can house a link or file with a description added to it. Posts can be collected or followed by other users on the Hub.

Collection: A collection houses all posts in one file. A collection must be produced before uploading content into the collection. The relationship of a collection and a post is similar to a filing system. The collection is the file and the posts are the documents or content that is placed in the file. Both posts and collections can be reposted or collected by users of the Hub. The privacy settings of a collection determine who can view the collection and its posts.

What happens when you collect a post/collection?

When a user collects a collection or post on the Hub, the user is saving the information into his or her collections. When collecting a post, the content of the post is resubmitted as a new post in a collection owned by the user. When a collection is collected, the user is saving the collections URL as a new post in a collection owned by the user. Then the user can simply revisit the collected collection by clicking on the new post in the collection.

Creating a Collection

1. Navigate to <https://yourhub.org/collections>.
2. Select the **Collections** tab at the top of the Collections dashboard.
3. Click on **New Collection** to create a new collection
4. Select the privacy of the new collection to be public or private from the drop-down.
 - **Private**: A lock appears on private collections after creation. This just informs you that this collection is only viewable through your account.
 - **Public**: All hub users can view the new collection and the collection will appear in search engines on the hub.?
5. Input the title and description of the new collection.
6. Click the **Save** button at the bottom of the page to save the new collection.

Collection Feed/Recent Posts

Collection Feed:

Anything that a user follows, such as a collection or another user, is placed on a Collection Feed. Whenever the collection or user posts a new post, the new post will appear on the feed.

The feed is the page you land on when you go to the Collections area from your Dashboard (<https://yourhub.org/members/yourmembernumber/collections>), labeled "Recent Posts".

How do I add to my Feed?

To add to the Collection feed, find a collection or user that posts information that is relevant to a study or research. Click "Follow" on a collection or "Follow All" to follow a user and all of their collections. To view all the users and collections that are currently being followed, click the "Following" tab, which is the last tab, at the top of the page.

Collecting a Post

1. Navigate to <https://yourhub.org/collections/>.
2. Navigate to a post or a collection and find a post that you would like to save or **Collect**.
3. To collect a post, hover over the post and click the **Collect** button. This will repost the original post into a different collection.

?

4. Select the collection or create a new collection for the post to be saved into. Add a description for the new post, then click **Save**.
5. The post will now be reposted into a new collection.

Collecting a Collection

1. Navigate to <https://yourhub.org/collections/>.
2. To collect a collection, hover over the collection.
3. Click the **Collect** button. This will add a new post to your collection with a link back to the original collection.

?

4. Select the collection or create a new collection for the post to be saved into.
5. Add a description for the new post.
6. Click **Save** and the collection will now be reposted into a new collection.

Commenting on a Post

1. Navigate to <https://yourhub.org/collections/>.
2. Navigate to a post or a collection and locate a post.

3. Hover over the post and click the **Comment** button.

?

4. Type your comment into the text box.
5. If you do not want your name to appear as the person who posted the comment, click the box for **Anonymous**.

3. Click on the **Following** tab at the top of the Collections landing page.
4. Click the **Unfollow** button for the collection you would like to stop following, the collection's content will no longer appear on your **Recent Posts** tab.

Changing the Layout

Note: You have to be logged into your hub in order to complete the following tasks

1. Navigate to <https://yourhub.org/collections>.
2. Locate a collection and click on the blue title to open up the collection.
3. To the right of the tabs there are two icons that change the layout of the collection's posts.
4. To change the layout, click the **View as a list** button or the **View as a grid** button.
 - a. **View as a list** will sort the posts inside the collection from newest proceeding to oldest; posts will be stacked horizontally.
 - b. **View as a grid** will sort the posts inside the collection from newest proceeding to oldest; posts will be formatted into a grid.

Sorting Posts

1. Navigate to a **Collection** that you wish to change the ordering.
2. Click the **Edit** button and then from the *How posts are sorted* drop-down select **Created date** or **Defined ordering**.
3. Click **Save** to save the new sorting method.
 1. **Note:** You can sort the posts from the inside the collection by clicking on the different sorting buttons.
