Custom Macros

Overview

Super groups have the ability to create their own custom macros or override any existing macro [[MacroName(args)]].

Custom Macro Class Structure

```

*/

```
namespace PluginsContentFormathtmlMacros;
use PluginsContentFormathtmlMacro;
/**
 * Wiki macro class for displaying hello world
 * /
class {{macro_name}} extends Macro
{
 /**
  * Returns description of macro, use, and accepted arguments
  *
  * @return
                array
  */
public function description()
 {
  $txt = array();
  $txt['html'] = '
Put macro description here...
';
  return $txt['html'];
 }
 /**
  * Generate macro output
  *
  * @return
                string
  * /
public function render()
 {
  return 'Return any html content you want this macro to render';
 }
}
```

Overriding Macros

To override a macro, copy the original macro located in /{web_root}/plugins/content/formathtml/macros/ into your groups macro folder /{web_root}/site/groups/{group_id}/macros/. You can no modify the render functionality, add or remove params, etc.

Note: The Macos class name must remain the same and the class must implement a render() method. You are free to add or chanage other methods.

Note: If the original macro file is located within a subfolder, you must recreate that folder structure in the groups macros folder for the override to work.
