

Constants

System Constants

These constants are defined for use in the CMS and extensions:

DS	Directory separator. "/"
PATH_ROOT	The path to the current installation.
PATH_CORE	The path to the core framework of the CMS.
PATH_APP	The path to the app directory. This is where all a hub's data, custom code, and uploads will reside.

Note: These paths are the absolute paths of these locations within the file system, NOT the path used in a URL.
