

White list of directories through the CMS

[Download \(pdf\)](#)

Any super-user can whitelist a directory via the /administrator interface. Follow these steps to complete this request:

1. Navigate to the **/administrator** interface and login
2. Hover over **Components** then click on **Tools**
3. Click the **Options** button and under **Directory Parameter Whitelist**, add a "," then the directory
 1. For example: , /home
4. Click **Save & Close**
5. Make sure that you complete this task on all the requested machines (i.e. production, stage, dev, qa, etc.)
