

Example Files

Small Files

Files less than 100MB, can be placed in the 'data' or 'examples' directory within the tool repository.

Large Files

Files greater than 100MB, should be placed in the appropriate /data directory outside of the tool repository. This path can be accessed directly. In typical situations /data is organized by tool and/or group. Either of these locations is suitable for maintaining large static datasets.

Note: this is by special request only, please contact your HUB administrator.
